

Honeycomb Blinds

Install Honeycomb Blinds and live in sweet insulated harmony with your home and the environment.

GREAT THERMAL INSULATORS

ECO-FRIENDLY

COMFORT ZONE

Made from two or more layers of 100% nonwoven polyester material joined at the pleats, Honeycomb Blinds have cellular compartments that trap air and thereby increase both heat and sound insulation.

Available in 100 fabric options including 25mm single cell, 45mm double cell and 45mm single cell, our Honeycomb Blinds give you more choices, more comfort and more energy efficiency.

- Top-down or bottom-up operation – the left and right cords allow control over where the shade is positioned within the window.
- Smartfit option for unique or hard-to-reach windows and sloped windows such as skylights.

BY CHOICE

- Corded or cordless (which requires just a gentle lift or downward pull to close or open the shade). Great safety feature for children's spaces.

Fabric range split into 6 categories:

1. Sheer: A versatile translucent fabric
2. Light Filtering: See-through with light diffusion
3. Semi-Opaque: Medium opacity for enhanced light diffusion
4. Room Darkening: High opacity for privacy and light filtering
5. Designer Fabrics: A unique look
6. Flame Resistant: NFPA 701 compliant

CHOICE FINISHES

- Lightweight yet durable
- Great energy-efficient thermal insulators
- Eco-friendly
- Safe for children
- Space-smart – doesn't take much space in your window
- An array of functional operating mechanisms
